

## Industrial transfer

Do you need a turnkey service with guaranteed lead times to transfer your production equipment?

**Bouygues Energies & Services** can support **the transfer and assembly of your equipment in France and worldwide**, ensuring that safety, deadline, quality of service and budget requirements are met.

Bouygues Energies & Services factors in your particular needs to build a **tailor-made project, in line with your objectives**. This includes identifying the project's critical paths and bottlenecks, and assessing sensitive issues.

### WE APPLY A RIGOROUS METHODOLOGY TO ENSURE YOUR PROJECT IS SUCCESSFULLY COMPLETED

- 1 Preparation: identifying each item of equipment and drawing up an inventory prior to transfer
- 2 Dismantling and disconnection of production lines
- 3 Handling and transport
- 4 Re-installation of production lines
- 5 Assembly, adjustment and connection of machinery
- 6 Commissioning and testing / Acceptance

Our meticulous pre-transfer preparations, our tried and tested project management and our ongoing communication are key to the success of your project.

### They trust us:

» ARAYMOND  
Bouygues Energies & Services transferred ARaymond's long-standing metal plant, located in central Grenoble (south-east France), to new buildings under construction in St Egrève (north of Grenoble). Completed in 6 weeks, the project required 120 transfers and involved 60 technicians at peak times.

The most delicate stage of the transfer involved moving 11 cutting presses weighing between 10 and 60 tonnes onto 5 and 7-axle special convoy loaders.

# Your partner for industrial transfer needs

Bouygues Energies & Services leverages its expertise to bring you tailor-made, turnkey transfer services that match your specific requirements.

## WE SUPPORT YOU FROM THE EARLIEST STAGE, INCORPORATING ALL OF YOUR EXPECTATIONS

- Transfer pre-feasibility study: feasibility analysis, costing and scheduling
- Technical expertise in condition and operation: laser geometrical control, Ballbar, vibration analysis, thermography, performance assessment
- Line alterations and adjustments
- Electrical and mechanical retrofitting of production equipment
- Machinery compliance

## WE ANTICIPATE RECURRING REQUIREMENTS AND SAVE TIME AT THE NEW SITE

- Adjustment of automation equipment and robot trajectories
- Layout for installing equipment at new site
- Alignment of machinery

## WE DELIVER SERVICES OVER AND ABOVE TRANSFER

- Dismantling of non-transferred machinery and utility and electricity networks
- Design and installation of utility and electricity networks for production lines

## Our added value

- Rapidly available project resources to ensure timely completion of your transfer
- Technical experts in each of our business lines (electricity, mechanical, automation, etc.)
- Continuous training for our technicians to guarantee that our expertise always dovetails with your projects
- Our own resources to ensure better control of our projects: design offices and workshops (wiring, boiler-making, ironwork and assembly)

Our energies for a **Better Life**
